

PARCELS POST FOR HAWAII AND JAPAN

The arrangement made for a parcels post service between Japan and Hawaii, as well as other countries, is presented in the following letter to the Japan Gazette from the Japanese Superintendent of Foreign Mails at Yokohama:

Sir: I ask your favor to be kind enough to acquaint the public with the following:

A convention for the direct exchange of postal parcels between Japan and the United States, the want of which has been much felt by the public hitherto, has been concluded at last and it will come into operation on and after the 1st of August, 1904.

Merchandise and any other articles admissible to the mails may be sent to or received from the United States, including Hawaii and Porto Rico, in unsealed packages, by the parcel post excepting letters, postal cards and written documents of every kind.

The parcels must not exceed 50 U. S. dollars in value and 4 pounds 6 ounces (525 momme) in weight. The maximum dimensions are 3 feet 6 inches (3 shaku 6 sun) in any direction or 6 feet (6 shaku) in length and girth combined.

The postage chargeable on parcels is 24 sen per pound or fraction thereof. Such parcels shall be forwarded only by means of the steamers of the Nippon Yusen Kaisha and of the Toyo Kisen Kaisha, which are plying between Yokohama and Seattle or San Francisco respectively.

The following articles cannot be transmitted: Publications which violate the copyright laws of the country of destination; poisons and explosives or inflammable substances; fatty substances; liquids and substances which easily liquefy; confections and pastes; live or dead animals, except dead insects and reptiles, when thoroughly dried; fruits and vegetables which easily decompose, and substances which exhale a bad odor; lottery tickets, lottery advertisements or lottery circulars; all obscene or immoral articles; articles which might in any way damage or destroy the mails or injure the persons handling them.

Yours faithfully,
T. AONUMA,
Superintendent Foreign Mails.
Yokohama, July 16th, 1904.

TOOK VIEW OF WAIKIKI

Everybody was there to get his "picture took" yesterday. When the report spread that photographer Arthur Rice was to take a panoramic view of Waikiki beach from the Young Hotel Annex to Diamond Head all Honolulu made strenuous efforts to get within those limits. At least the beach was well filled with bathers and onlookers whose pictures will, it is hoped, bring many to the Paradise of the Pacific after the Promotion Committee spreads them abroad. After being photographed himself in his bathing suit with his camera under his arm, Mr. Rice went in a canoe to a big tripod which had been erected on the reef opposite the Hawaiian Hotel Annex and took the picture. It certainly ought to be a success, for there was something doing in the water every moment. There were upsets, duckings and the like to furnish amusement for the crowd.

Miss Castino led the meeting of the Christian Endeavor Society of Central Union church on the subject, "How to break down the spirit of caste." Veteran Electrician.

John Cassidy, one of the pioneer electricians of Honolulu, has opened business for himself as an electrical engineer and contractor at 159 South King street. His card appears in this paper. He needs no introduction to the older residents, who will remember when Honolulu boasted the best telephone service anywhere under his superintendency. For some years, too, Mr. Cassidy was in charge of the Government electric light works. Lately he executed a contract with the Board of Health to build and establish a telephone system on Molokai. His reputation in the community is that of a man who does all he undertakes with his might.

Bring the wrinkles round your eye."

"The wrinkles which thy glass will truly show"—as Shakespeare puts it, are often quickly removed by the timely use of proper eye-glasses.

The cosmetic value of right glasses is sometimes truly miraculous, removing tell-tale crow's-feet and causing drooped eye-lids to resume normal positions.

Cosmetic value of good lenses must be supplemented by perfectly fitting frames, accurately adjusted to size and contour of face.
